State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Normal Operations	Normal Operations	Normal Operations

Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **CDPH Statewide Travel Advisory**

As of 06/15/21, CDPH and the CDC recommend delaying travel until persons are fully vaccinated. For more information: [CDC Travel Guidelines](#)

- 185,152,685 (+2,767,634) total confirmed cases
- 3,948,996 (+55,366) total deaths

Confirmed United States COVID-19 Case – Per Centers for Disease Control and Prevention (CDC) as of 07/04/21 at 1700 hours:

- 33,545,316 (+93,568) total confirmed cases
- 603,181 (+1,675) total deaths.

Confirmed California COVID-19 Cases - Per Medical Health Coordination Center as of 07/06/21 at 1700 hours:

- 3,719,674 (+4,861) total confirmed cases

COVID-19 Vaccines Administered – Per Vaccine Task Force as of 07/05/21 at 1700 hours:

- 41,996,883 (+517,664) vaccines administered
- Please see attached California Health & Human Services (CHHS) Agency / Cal OES Joint Situation Report for additional details

SITUATION SUMMARY

2021 July Extreme Heat Event

- Phase II of the Heat Contingency Plan has been activated starting 07/08/21 due to forecasts of dangerous and excessive heat.
- A 1000-hour Statewide Conference Call has been coordinated starting 07/07/21 and running until 07/09/21 with plans to continue the calls into the weekend as the situation warrants.
 - The Conference Call is in response for potential impacts due to the heat, and weather models predicting possible higher temperatures than the Late June 2021 Heat Event.
- On 07/07/21 the Sit Cell activated to Enhanced Watch for Incident Reporting for the July 2021 Heat Event.

M6.0 Antelope Valley Earthquake (FINAL)

On 07/08/21 at 1549 hours, a M6.0 earthquake occurred at a depth of 7.5km about 33km SE of Markleeville, CA along the eastern edge of the Sierra Nevada near the California-Nevada border. This earthquake was on a normal fault in the shallow crust of the North America plate.

As of 0645 hours on 07/10/21, over 25,800 Did You Feel It Reports are listed on the USGS website for the M6.0 earthquake.

According to the USGS, as of 0645 hours on 07/10/21, there have been 506 aftershocks following the M6.0 earthquake:

- M5.0 or Greater: 1
- M4.0 – M4.9: 7
- M3.0 – M3.9: 39
- M2.0 – M2.9: 179
- M1.0 – M1.9: 272

The updated USGS Aftershock Forecast indicates that there is a 1% chance of one or more aftershocks larger than M6.0 within the next week. Smaller earthquakes of M3.0 or higher are more likely over the next week. Aftershocks will continue to decrease over time; however, a large aftershock can temporarily increase the numbers.

Per the USGS, the chance of more aftershocks occurring until 07/16/21 is:

- The chance of an earthquake M3.0 or higher is greater than 99%, with estimates of 4-27 events above this magnitude occurring.
- The chance of an earthquake M5.0 or higher is 12%, with an estimate of 0-2 events above this magnitude occurring.
- The chance of an earthquake M6.0 or higher is 1%. This magnitude is possible, but low probability.
- The chance of an earthquake M7.0 or higher is 1 in 800. This magnitude is possible, but low probability.

This forecast will change as time passes.

The Cal OES SHB Duty officer continues to monitor the situation in coordination with CGS and the USGS. [This is the final report on the M6.0 event unless significant new information is available.](#)

SITUATION SUMMARY

2021 July Electrical Transmission Emergency

The California Independent System Operator (California ISO) has declared a Stage 2 System Emergency Notice and a Flex Alert due to extreme heat and wildfires.

- California ISO has extended a statewide Flex Alert for a second day to avoid a possible shortage of energy as extreme heat in California and a growing wildfire in Southern Oregon threatening transmission lines continue to strain the state's electric grid.
- When the Flex Alert is in effect again on Saturday, 07/10/21, between 1600 hours and 2100 hours, consumers are strongly encouraged to conserve energy.
- A Flex Alert is a call for consumers to voluntarily conserve electricity when there is a predicted shortage of energy supply, especially if the grid operator needs to dip into reserves to cover demand. When consumers reduce electricity use at critical times, it can prevent more dire emergency measures, including possible power outages. Go to flexalert.org for more information.
- All three utilities (PG&E, SCE, and SDG&E) activated their EOCs and were assigned a Cal OES Representative for the Stage 2 Emergency.
- California ISO issued a Restricted Maintenance Operations notice for today 07/10/21 from 0600 hours – 2200 hours.
 - Requires generators and transmission operators to postpone any planned outages for routine equipment maintenance, ensuring all grid assets are available for use.

WEATHER KEY POINTS

07/10/21 - 07/16/21

Saturday-Friday

- Hot temperatures continue for much of interior and southern California, with **high to very high heat risk** impacts through Monday
 - High temperatures across much of the Central Valley and interior southern California will range from upper 90s to around 115 for the weekend, with areas into the 120s in the southern deserts and near 130F at Death Valley.
 - Excessively warm overnight temperatures are also expected through Monday. **Overnight low temperatures will range from 15-25 degrees above normal for early-to-mid July.**
 - **Many locations will approach or break daily records throughout the event, both for daytime high temperatures and high overnight low temperatures.**
 - **Compared to recent significant heat waves this year, the high temperatures will be slightly warmer than recent events, and the overnight lows will be several degrees warmer than previous events.**
 - Slightly cooler but still above normal temperatures expected for the middle of next week.
- Breezy conditions each afternoon will persist in the foothills and mountains, bringing periods of elevated fire weather conditions
- Isolated thunderstorms are possible as across southeastern California and across the Sierra, though precipitation amounts are not expected to be significant
 - Northern, coastal and most southern California locations will remain dry throughout the week
